

SELLING

MEET OUR SELLING SERVICES

FBM® always finds solutions to meet clients' needs and expectations. Although FBM® recommends its full-service program in which the gaming machines are installed and maintained by FBM®, it allows casino operators the freedom to choose the most suitable option for their business.

OUR GAMING MACHINE SELECTION TO SELL

Some business owners might be more interested in buying gaming machines other than leasing them, that is why FBM® offers two slot gaming machine options available for purchase.

Clients can also purchase custom-made gaming machines, in which they will be able to run their own software (learn more on our “Exclusive Design” Service).

Either way, FBM® will help its clients get the best out of their products.
